REDFORD TOWNSHIP | WAYNE COUNTY

THE NEXT FLOCK DECISION STARTS WITH THE CONTRACT.

Verified local facts, current gaps, and the next useful action.

STATUS: CURRENT FLOCK USE SUPPORTED BY TOWNSHIP RECORDS | CONTRACT RESEARCH ACTIVE

What Redford's records show

- March 25, 2025: the Township Board unanimously approved renewal of 6 current Flock cameras, 3 additional Flock cameras, and 2 Condor cameras for $41,550.
- That action covered nine Flock vehicle cameras plus two Condor video cameras. It does not, by itself, prove every approved camera is installed and active today.
- May 12, 2026: township financial records show an $18,000 payment to FLOCK GROUP INC. labeled "2026 - 2027 FLOCK RENEWAL - POLICE DEPT."

The most important missing record

The current executed 2026-27 Flock agreement.

It should tell residents the exact term, expiration, automatic-renewal language, nonrenewal notice deadline, termination rights, products, current cost, and controlling data/sharing terms.

Why that matters

A surveillance contract can feel permanent when nobody knows when the decision happens. Once the controlling agreement is public, residents can work backward from the real notice deadline and organize for nonrenewal before the next term is triggered.

Our Redford ask

Allow the current Flock agreement to expire or lawfully terminate it, do not replace it with a materially similar mass vehicle-tracking system, and remove the covered surveillance infrastructure.
